

STRONG SIGNAL IT

*... bringing **LINUX** to small business in Melbourne.*

Don't get left behind ...

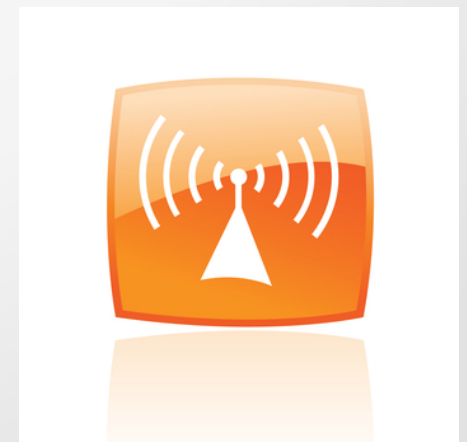

Strong Signal IT provides quality computer support, maintenance and repair services for small businesses in Melbourne.

The emphasis is on providing low-cost, yet stable, Linux / open-source solutions, while also taking care of Windows and MAC OS-based platforms.

What Is Your Current *IT* Set-up?

- Individual unconnected desktops with peripherals?
- Networked desktops via server(s)?
- Networked desktops via the cloud?
- Which Operating Systems are in use, and are they still supported?
- What specialist software is being used?

What *IT* Support Do You Have Now?

- Family member/friend or tech-savvy staff member
- Ad-hoc/ call for help as needed
- None!
- Managed IT support from professional provider

Are You Considering ...

- Improving the performance/efficiency of your hardware components?
- Upgrading/changing your software due to licence requirements or to improve productivity?
- Incorporating web-based services ?
- Upgrading/moving to a new operating system?
- Incorporating mobile devices and remote access to your system?

Your 'Business - *IT* Provider' Relationship

- thorough understanding of your business' IT needs;
- based on attentive communication;
- cost is realistic reflection of your business needs.
- convenience and reliability;
- prompt response times are critical;
- services offered are reliable.
- quality of relationship with business client;
- small IT team can provide personalized service.
- experience and willingness to offer a large range of *Linux* and open source options for software and OS solutions.
- experience and expertise.

Key Elements Of *IT* Support

- Ensure a balance between cost minimization and achieving your IT needs is maintained.
- Set up, maintain and verify data back-up systems and monitor data security issues.
- Advice on right choice of equipment and software.
- Provide service with a smile, and in plain English!
- Provide scheduled maintenance of your IT system, with written reports / logs.
